Vanes

Repair parts for:

Gasboy consumer pumps

Making repair parts for this segment of the Gasboy product line is a perfect match for our capabilities both from an engineering and manufacturing knowledge and capabilities standpoint. Over the years SVI has continually expanded in virtually all skill sets to be a premier supplier of repair products and new equipment to the industries we serve. These industry segments include automotive, hydraulic, petroleum and lubrication.

Setting out to make repair parts for Gasboy products available was just a natural progression for us. We will do an excellent job with the parts we offer for Gasboy in all facets including pricing, quality and non-stop availability from any of our three "Ready Ship" warehouses located in Baltimore, Chicago and Los Angeles.

Dial Glass

An American Icon

Gasboy consumer series pumps can be found all over the American landscape. They are reliably used everyday by farmers, contractors, municipalities, oil companies, landscaping crews, road construction crews, tree nurseries, excavators, park districts and more. You can easily say Gasboy pumps have been keeping this Country on the go for over seventy years. No pump has proven more reliable or easier to service or been more responsible for the progress of a great nation than a Gasboy.

SVI along with our William Douglas™ brand repair parts for Gasboy are ready to help keep this Country moving and your Gasboy pump working hard for you many years into the future. Gasboy pumps are very easy to rebuild and everything you need from motors to rotors will be available to keep your pump running like new. You can rebuild a 70 series pump in a matter of minutes and despite some faded paint on the outside internally it will be just like new.

No more throwaway society mentality here, repair it versus replace it is the more responsible course of action. The old saying - "they sure don't make em like used to" rings true. There are Gasboy pumps still in service that are 30, 40, 50 or more years old. Now let's see how long they will really last.
