COVER EM UP WHEN SERVICING

WITH NEW K-CAP AIR VALVE COVER

THE SVI K-CAP

Valuable Distributor Input has lead to yet another innovative new product.

SVI's NEW K-CAP Valuable new product provides for more assurance when using or servicing in-ground lifts.

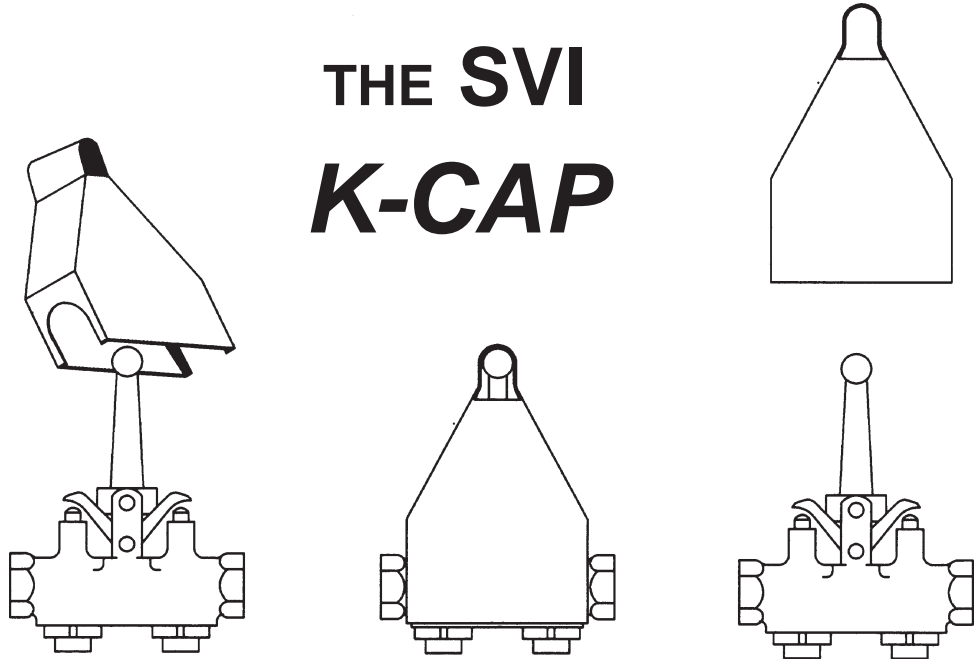

Only available to SVI Distributors, the K-Cap is a good add-on sale item during any service or sales call. It is easy to demonstrate, simply walk up to any semi

or full hydraulic lift using a Kingston air control valve and slip it on. The air control valve is now capped to provide an additional level of safety assurance.

Ideal Uses: Great for Lift Service Professionals - slip the K-Cap on the air control valve when servicing the lift to prevent someone from accidentally operating the wrong valve. A Must for Every Safety Concious Mechanic - with the K-Cap in use, the chances of someone inadvertently lowering or raising the lift are greatly reduced.

Each SVI K-Cap comes ready to use with an opening at the top so it can be hung somewhere near the air control valve for easy access. Every K-Cap is painted safety yellow and designed for years of trouble free use.

LIFT PROFESSIONALS - SVI is your Answer!

SPECIFY ONE K-CAP PER KINGSTON VALVE.

KEEP SOMEONE FROM INADVERTANTLY USING AIR CONTROL WHILE SERVICING OR WORKING UNDER A LIFT.

MAY HELP OSHA SAFETY INSPECTIONS GO SMOOTHER.
