SVI International, Inc. is a leading producer of high capacity, low pressure single-acting cylinders for various industries. Effectively a combination of Globe Lift and the former Gilbarco lift division, SVI has an extensive engineering data bank that extends back to 1928. This broad knowledge base and an ever present can-do attitude has driven SVI into many markets as a mainstay supplier of products to increase shop and in the field productivity.

SESM lifts from SVI are a perfect solution for those engaged in the sale, service and use of equipment associated with outdoor activities. Our style of lifts can be found in golf cart dealerships, landscape equipment maintenance shops, ATV dealers, motorcycle shops and just about anywhere else someone wants to make their job more productive and easier to accomplish.

SVI is a family-owned business that also operates two subsidiary businesses—MLM Lifts and Mfg. (a specialty fabrication shop and hydraulic cylinder company) and Valley Precision Solutions (a customer-specific hydraulic seal company). Great pride is taken in the job we do, as SVI is an America-First enterprise. We support American jobs, American craftsmanship, American engineering and all the American companies we can proudly call our customers. Please put an SESM lift to work for you in your shop today. Become a fan of SVI and add to our growing list of wonderful testimonials from satisfied customers. You will not be disappointed.

**EASY INSTALLATION
OF SESM LIFTS —
Installs in 3 Hours or Less!!**

Simply saw through concrete.
Auger hole for cylinder.

Place cylinder in hole.

Drill holes, anchor
down, and add fluid.

Install Lifting Structure and take
full advantage of your cool
time-saving tool.

**~ DOES NOT REQUIRE ELECTRICITY
OR HYDRAULIC PUMP ~**

HOW THE LIFT WORKS

This semi-hydraulic air/oil lift may be the easiest lift to operate in the world. Simply connect a flexible shop air line to the supplied valve control line and depress the valve introducing air to raise the lift. Once raised to the desired height, release the valve, disconnect your air line and the valve control line if you wish. The lift will stay up in place. When it is time to lower the lift, reconnect the valve control line (if you removed it), and depress the valve. The air will slowly discharge through the valve and the lift will return back to the floor. Or, release the valve at any point during descent and the lift will promptly stop going down for your next work level. *It's that easy!*

Valve
Control Line
(Standard)

benefits Install Anywhere

- Work at your height, not the floor height
- Tie down slots included in the platform to prevent tip overs during rigorous service activities
- Full access for front and rear wheel service and removal
- Helps recruit and retain the best shop technicians
- Operates off shop-air compressor / Self-contained unit, no under floor piping, no external air/oil tank
- Capacities from 1,000 lbs. to 25,000+ lbs. For larger capacities, ask about our LESMs.
- Fiberglass Encapsulated Casing Protects from Corrosion
- Various Stroke Lengths and Cylinder Sizes
- Compatible with all Hydraulic Fluids including Coast Guard and US Forestry Service Approved Environmentally Safe Fluids
- Design that lasts more than a lifetime
- Easy-to-service, only 1 moving part!
- Greatly improves shop productivity
- Ideal for rental properties—this lift is easily removed for relocation. Simply unbolt from the floor and remove. Add some backfill to existing hole and patch the concrete like it was never there. Reinstall lift in your new location.
- Must-have for busy shops
- 360° rotation keeps you between the work and the workbench
- No obstruction when lowered—park right over it.
- Superior operation and safety compared to imported above-ground scissor lifts
- Get the real deal for All-American shops — Welded together by Americans for Americans!
- **The best purchase a shop owner/operator can make!**

options

- TDC chrome-plated plungers — *Make it last forever!*
- Various style of wheel chocks made of steel or rubber
- Rubber Stack Pads (1-1/2" or 3" Tall)
- Safety Leg / Non-Rotator
- Safety Leg / Rotator to allow full 360° rotation of the platform
