BH-7006-01LS Series - Single Phase

SPX Stone Power Unit

LS Series • Power Unit with Limit Switch

SPX Stone power units are a compact hydraulic power source utilizing an electric motor with the capability to generate high pressure ratings. The units are built specially for SVI and the industry it serves to provide a wide range of customer-specified pressure relief valve settings. The ability to properly select the required pressure relief allows industry professionals to confidently match the right power unit to the application. SVI performs this service routinely every day to ensure power units are shipped on a same-day basis with the correct pressure relief setting required for the job.

The Overhead Limit Switch Release is connected to a cable that goes up to the overhead and across. The switch housing is installed at the top of the push-to-raise housing on the power unit and below the limit switch release is another micro switch wired in concert with the push-to-raise micro switch. When a vehicle hits the overhead limit bar the cable is pulled up moving the switch housing plunger up and off the second micro switch pushbutton which opens the circuit and causes the lift to shut down, stopping its upward movement.

The #1 Source for Auto Lift Power Units!

BH-7006-08 / BH-7007-03 Series
Single Phase • SPX Stone Power Unit

SPX Stone power units are a compact hydraulic power source utilizing an electric motor with the capability to generate high pressure ratings. The units are built specially for SVI and the industry it serves to provide a wide range of customer-specified pressure relief valve settings. The ability to properly select the required pressure relief allows industry professionals to confidently match the right power unit to the application. SVI performs this service routinely every day to ensure power units are shipped on a same-day basis with the correct pressure relief setting required for the job.

BH-7006-08 Series
115/230 VAC, 1HP, 1PH, 3450 RPM Motor • 4.0 Gallon Reservoir

| Frame: 56 FR | Maximum Run Time: 75 Seconds |
| Max Amps: 115/230 VAC 13/6.5 | Pressure / Return Port Size: 9/16" SAE |
| Pump: 1.2 GPM@2200 PSI | Auxiliary Return Port: 3/8" NPT |

BH-7007-03 Series
115/230 VAC, 1HP, 1PH, 3450 RPM Motor • 4.0 Gallon Reservoir

| Frame: 56 FR | Maximum Run Time: 75 Seconds |
| Max Amps: 115 VAC 19 | Pressure / Return Port Size: 9/16" SAE |
| Pump: 0.79 GPM@2200 PSI | Auxiliary Return Port: 3/8" NPT |

The #1 Source for Auto Lift Power Units!

**BH-7003-01 Series - Single Phase Import VIBO Power Unit**

**Alternative to SVI’s BH-7006A-18 Power Unit**

**VIBO** is a leading offshore enterprise specializing in the research, development and manufacture of hydraulic power units. The shop utilizes state of the art equipment and high grade materials to produce a full line of products including those featured by SVI.

Their professional design team provides hydraulic solutions for the customers it serves, including specialized solutions for custom applications.

VIBO operates with a “Win-Win Development” commitment to provide SVI with excellent service in terms of price, product quality and technical support. Valuing a relationship and the mutual benefit of cooperation with SVI, VIBO is leading the industry as an excellent brand when value pricing with an eye on quality is a top priority.

VIBO—Value / Innovation / Belief / Obligation

**220 VAC, 3HP, 1PH, 3360 RPM Motor**
