Auto Lift Power Units (Import)

For decades, the SVI "America-First" management team resisted many requests and demands that SVI begin offering a low-cost imported power unit. As time passed, so too has the mix of lifts being imported. With 100% exception to American-Made lifts by SVI, just about everything else (lift-wise) available today is imported or has a very high content of foreign parts. As a result, demands for a low-cost power unit have increased steadily due, in part, to the numbers of home-owned/hobbyist and just about every other lift now imported.
