RESOURCE ENGINEERING, What is it?

SVI operates with a staff of fully degreed mechanical engineers, and resource engineering is a practice employed to provide customers with alternative solutions for parts and products that others simply abandon or price too expensively. This means SVI will re-continue parts that others have discontinued or make overpriced parts available for a reasonable cost. All you have to do to experience the benefits of SVI is provide input on parts or kits that could be available from SVI, and engineering goes to work.

SVI specializes in innovative cost-reduction resource engineering. Tell us you want a better priced repair kit for DEF diaphragm pumps, lower cost repair parts for hose reels, air motor rebuild kits for lubrication equipment, lower cost dry lock nozzle repair kits, or whatever. You name it, tell us about your demand and put SVI to work for you as your cost-saving source—SVI is your Answer.

THOUSANDS AND THOUSANDS

SVI is the largest single supplier of repair parts for most makes and models of automotive lifts. SVI stocks thousands and thousands of parts for immediate shipment. In addition, SVI is a large supplier of popular accessory items used on automotive lifts such as the air / electric Power Station™ that is frequently installed directly on the lift column to provide more productive tech access to an air and electric supply for tool use and tire inflation.

PRODUCTS ON DEMAND

When word of the discontinuance of the auto tank drain for Champion air compressors reached SVI, SVI went right into resource engineering mode. Engineering drawings were created, tooling was purchased, parts were produced and the auto tank drain valve for Champion was re-introduced by SVI. In addition, the rebuild kit for drain valve was also introduced. This saves compressor owners and distributors tons of money without the expense of retrofitting something different. SVI is your Answer!

Put SVI resource engineering to work for you, too!

Strainer Assembly

for Waste Hose Suction Lines & Fluid Transfer

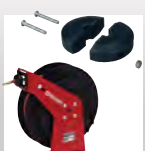

Stop the mess and make clogs easier to solve than ever before.

This waste oil suction line strainer from SVI allows for the free flow of oil in one direction. Hold vertically or horizontally under slight back pressure to prevent backflow leaking. Get a clog, pull the suction line out, wipe the clog clear and go right back to pumping without all the mess and stress.

Made of a durable nylon material, this strainer assembly is a must-have for anyone who routinely engages in waste oil evacuation or fluid transfer systems. **SVI is your Answer! Call for more information or to place an order.**
