For Rotary: DTO28 Rack and Pinion Equalizer Kits

SVI worked carefully with a distributor to design a system to extend the service life of DTO28 lifts produced by Rotary. Problems start when floor cleaners and moisture cause the equalizer box to corrode. This results in backfill pouring through the rusted openings and interfering with the equalizer operation, thus hanging the lift up.

In the past, there were only three ways to deal with the problem. You either excavate and replace the corroded box at great cost, scoop out the backfill every so often or condemn the lift. This is over with SVI's new **Drop-In Rack and Pinion Equalizer Assembly for DTO lifts.**

Order BH-9760-09 Kit for 4" Wide Box

BH-9760-09AL Drop-In Auto Lock for Equalizer Assembly

BH-9760-10 Kit for 4-3/4" Wide Box

Installation is a breeze:

- 1) Remove the old equalizer frame.
- 2) Clean out the bottom of the box at the ends so rack guides fit to the bottom.
- 3) Assemble the new rack bar guide tubes to cross supports, drop in the opening and square up.
- 4) Assemble the pinion housing and shaft assembly, set in box and line up with the guide tubes.
- 5) Drill (20) 3/8" holes in the concrete using the pinion housing as a template and bolt housing down using the anchors supplied. **Note:** make sure rack bars mate properly with pinions and fit easily through the housing before drilling and bolting.
- 6) Install rack bars making sure each starts with the same tooth and bolt to bolster. You may need to elongate the bolt hole in the bolster with a torch so the rack movement is perpendicular to the plunger.
- 7) Show your customer how good the lift works again and accept thanks for solving the problem.

Detailed Instructions are included with each kit.

The Return Forms are valid for 30 days, from the date of issue. All Returns are subject to restocking charges. Return parts brought into our remote warehouses, will not be accepted by our personnel, without a Return Merchandise Form from the Main Office. Parts which have been used in any way or manner, including any installation or incorporation into a lift, hoist, or other equipment, shall NOT be eligible for return whether or not a Return form has been assigned. **Please note:** Electrical parts or components are not returnable for credit. This includes all switches, pushbuttons, relays, electric motors, capacitors, fuses, solenoids, power units with wiring issues or any other electrical items. Custom, built to order, special order, and non-stocked genuine parts are non-returnable.
10. **RESTOCK CHARGE.** Returns are subject to a restocking charge. Refusals are subject to the same restocking charge plus the cost of outbound and return freight charges and/or fees incurred by the Company due to shipment refusal.

The Company standard terms are net 30 days, C.O.D. company check, C.O.D. cash, VISA, MasterCard, Discover or American Express. However, if in the judgment of the Company, the financial condition of the Purchaser at any time does not justify shipment according to standard terms of payment, the Company may require full or partial payment in advance.
12. **INTERPRETATION.** This sales order is intended by the parties as a complete and exclusive statement of the terms of their agreement. It supersedes all prior agreements, written or oral. No course of prior dealings between the parties and no usage of the trade shall be relevant to supplement or explain any terms used in this sales order. Acceptance or acquiescence in a course of performance rendered under this purchase order shall not be relevant to determine the meaning of this sales order even though the accepting or acquiescing party has knowledge of the nature of the performance and opportunity for objection.
