

The **K-CAP** is Back!!

K-CAP AIR VALVE COVER

When servicing or using auto lifts, cover the air valve with SVI's K-Cap.

Buck the ALI's recommended procedure for LOCKOUT / TAGOUT on any in-ground lift operated by this style valve. There is no need to go through the trouble of cutting the piping, threading it and adding a lockable ball valve. This sounds like a lot of work and just does not make any sense to go through all that trouble when all you need is a K-Cap from SVI.

Originally introduced in 1998, the SVI K-Cap is back and now features a Lockout / Tagout padlock option and is ideal for lift owners and lift repair professionals alike. Call now to add safety assurance and use when performing lift service or routine inspections.

SVI'S K-CAP This sensible newly revised product provides for more assurance when using or servicing in-ground lifts.

Only available to SVI Distributors, the K-Cap is a good add-on sale item during any service or sales call. It is easy to demonstrate—simply walk up to any semi or full hydraulic lift using this style air control valve and slip it on. The air control valve is now capped to provide an additional level of safety assurance.

IDEAL USES: Great for Lift Service Professionals—Slip the K-Cap on the air control valve and install a padlock when servicing the lift to prevent someone from accidentally operating the wrong valve. A must for every safety-conscious mechanic and safety minded lift repair professional—with the K-Cap in use, it prevents someone from inadvertently lowering or raising the lift.

Each SVI K-Cap comes ready to use with an opening at the top so it can be hung somewhere near the air control valve for easy access. Every K-Cap is painted safety yellow and designed for years of trouble-free use.

SVI is your Answer!

- Sell one K-Cap per Air Valve.
- Prevent someone from inadvertently using the air control while servicing or working under a lift.
- May help OSHA safety inspections go smoother.
- Painted Safety Yellow.
- Easily slips on and can be locked in place for added safety assurance.
- Call today to place your order—800-321-8173
