SVI New Product Notice...

KINGSTON
Manufacturing reliable industrial valves for industry since 1908.

Condensate Drain Products

Kingston Condensate Drain Products are designed to provide efficient drainage of condensate from compressor tanks. The product line offers a mechanical valve to be used on compressors with an unloader port and an electric timer drain valve that can be used on all compressors.

FK-620 • Automatic Drain Valve

- Designed for use on all compressors with an unloader port
- Complete drainage is assured by double action of the valve (which opens when the compressor starts and stops)
- Long, trouble-free service is provided
- Through simplicity of design and the use of rust-resisting materials

Mechanical Auto Tank Drain
3/8" NPT

SVI Part #: FK-620-375

FK-KTD • Kingston Timer Drain Valves

- Designed for use on all compressors
- Pressure range up to 300 PSI IP65 when installed
- Interval time is 0.5-45 Minutes, Adjustable
- Discharge time is 0.5-10 Seconds, Adjustable
- Temperature range is -40° to 140° F
