

# Modern Bearing Upgrade

**What sets the best OEM (SVI) apart from other lift companies?** The answer is simple, PROBLEM SOLVING! SVI dominates with current solutions for problems encountered both new and old. The transitions/upgrades from standard designs to the ATF and finally the DUSL tell this story better than anything else. It is amazing how one company can make so many improvements that benefit lift owners all across the world.

## WEAVER

**Triple Bearing Modernization = DUAL UPPER  
Maximum Stability SINGLE LOWER**

### GOOD

#### Standard Bearing

### BETTER

#### Standard Bearing with Adjust-to-Fit (ATF)

Same as Standard, but with an Adjust-to-Fit groove for a perfect field fit and replaceable bearing.

**DUSL is all you need.**

### BEST

#### DUSL Bearing

Dual ATF Bearings

Yes, eliminate the packing follower and the vee rings, who needs them? Add in additional bearings, the most modern seal and wiper and put the bearing surfaces in the oil not above the oil for maximum lubricity and you have the best solution to making an existing lift like new again. Or, in the case of SVI lifting products you have the best design available on the market today. No one else builds lifts that incorporate both the SVI exclusive ingredients of "DUSL" and "ATF" technology, no one. SVI is your answer!

#### **DUSL is:**

- Maximum stability
- Best sealing system
- Easy to install
- Available in new lifts

## GLOBE

**Triple Bearing Modernization = DUAL UPPER  
Maximum Stability SINGLE LOWER**

### GOOD

#### Standard Bearing

### BETTER

#### Standard Bearing with Adjust-to-Fit (ATF)

10-5/8" Standard and Standard ATF Bearings are no longer available.

**DUSL is all you need.**

### BEST

#### DUSL Bearing

makes an old lift like new again.

As the once absolute dominate Worldwide favorite, Globe lifts can be found literally all around the globe. Today SVI continues this tradition and builds Globe brand semi-hydraulic lifts every day. These lifts may be marketed as Globe but they are distinctly SVI original equipment using only the SVI exclusive "DUSL" and "ATF" technology. This makes for one of the best sealing and most stable lifts on the market today. The "DUSL" system is available for virtually all 10-5/8" Globe lifts still found in service today. Use a "DUSL" bearing on a 30 year old Globe and you will stop the leaking and make the plunger play go away.
