SVI International, Inc.

Whether you're planning a new fluid delivery system or adding on to an existing one, SVI has the steel hydraulic line tubing, fittings and strut you need for the right price with fast delivery. We stock a variety of tube fittings including LENZ O-ring seal steel hydraulic tube fittings, Ferrule Lock, steel flare tube fittings, and standard steel pipe fittings. Our tubing is provided in easy-to-use 20-foot lengths in a full spectrum of gauges, sizes, and PSI specifications. We also regularly fill custom tubing orders for your unique requirements. Combine tube sizes in one order for maximum price advantage. If you're looking for SAE J525 Steel Hydraulic Tubing for use with Oil, Grease, Anti-Freeze and more, SVI is the one to call!

SVI offers same-day shipping on most in-stock repair parts with regionally located offices to cover the entire country with affordable, fast delivery. Orders for non-stock sizes and large quantities are processed quickly.

1/2"	210	1-1/2"	22
5/8"	139	2"	12

PREVENT PRODUCT DAMAGE • ECONOMICAL TROUBLE-FREE TRANSPORTATION

Reddi-Crate™ laminated paperboard packaging helps prevent product damage that can occur during shipping and handling. An economical replacement product for expensive wooden crates that are ideally suited for trouble free steel hydraulic line tubing transportation, its preformed profiles and two end closures form a shipping container that provides superior strength and protection at a very reasonable cost.

Reddi-Crate™ has a smooth surface and interior that is non-abrasive to products. Its standard exterior is a white clay coat. Reddi-Crate™ end plugs are typically 2 by 6 wood boards stapled in place to secure the ends and your tubing in place.

SVI's nesting-style Reddi-Crate™ is dimensional 20' 6" long by 10" wide by 6" tall. It is ideal protection to help protect your tubing shipments from the rigors of transportation.

Steel Hydraulic Line Tubing

TUBE SIZES MAY BE COMBINED FOR MAXIMUM PRICE ADVANTAGE.

SVI offers competitive pricing on Steel Hydraulic Line Tubing!

Need a Smaller or Larger Sized Tube than those listed? **Call for Details.**

Most any size you may need for an application is available.

Stainless Steel Tubing is also available.

- **SAE J525** This SAE Standard covers normalized electric-resistance welded, cold-drawn, single-wall, low-carbon steel pressure tubing intended for use as pressure lines and in other applications requiring tubing of a quality suitable for bending, flaring, forming, and brazing.
- **Stock Lengths: 20 Feet**
- **Priced per Length by Number of Lengths Ordered.**
- **Protective Packaging for Shipping Available.**

Caution: *Tubing should not be buried below grade without suitable protection from Electrolysis, Soil Condition or other factors that will corrode steel.*

Note: When operating pressures do not exceed 1500 psi maximum, advantages of using larger I.D. tubing are greater for the delivery of Oils, Anti-Freeze and other Non-Corrosive liquids with lower pressure pumps.

Save Cost: Always use tube bending equipment to make 45°, 90°, etc. bends to reduce the number of tube fittings needed for installation. SVI can provide you with the proper bending equipment, tube fittings and strut system supports. Check out the rest of this catalog for a variety of options. If you don't see what you need, or for more information, call SVI today!

Many sizes and other fittings available!

**LENZ O-RING SEAL
FITTINGS**

**FLARELESS FERRULE
LOCK BITE FITTINGS**

LENZ O-Ring Seal Steel Hydraulic Tube Fittings

Installation Instructions - O-Ring Seal Tube Fittings are Installed as easy as 1-2-3

1. Deburr the Tube

Prevents cutting the "O-Ring Seal". Not necessary to cut the tube square.

2. Slide Nut and Tapered Split Ring on Tube

The large end of the tapered ring should face the fitting.

3. Oil the O-Ring

Then insert the tube past the O-Ring.

4. Slide Tapered Split Ring

Slide up to the fitting.

5. Tighten Nut Hand Tight

Then with wrench tighten one turn or until the rear of the tapered ring is flush with the nut.

How the Split Ring Grips

Note the taper. As nut is tightened the ring is wrapped around the tube, gripping it in like manner to a locking collet in a chuck. This principle grips and locks tighter and stronger as the pressure increases. Note that the nut has nothing to do with the seal...It is separate!

Stainless tubing being 55% stronger than steel tubing allows lighter walls and is therefore commonly used for higher pressures without constricting flow. Stainless tubing does require the use of stainless sleeves even when used with steel fittings.

The Pressure is the Sealing Force

At Zero Pressure. When the tube is inserted in the fitting past the O-Ring there is a slight compression and the resiliency of the O-Ring makes a secure, lasting seal.

Under Pressure. The pressure is the sealing force, pushing the O-Ring to the edge of the groove. As pressure increases against the O-Ring it makes the seal tighter.

Under Vacuum or Suction. If vacuum or suction is applied the O-Ring responds to the condition and reverses its action to seal just as tightly.

- Teflon Backup Washer
- The O-Ring Seals the Tube.
- The Higher the Pressure the Tighter the Seal
- J.I.C. Approved, Meets All S.A.E. Standards
- A Hacksaw and File or Emory Cloth are the Only Tools Needed to Prepare Tube Ends
- No Exact Tube Length Necessary
- Not Necessary to Cut Tube End Square
- No Metal to Metal Seal
- Seal is Not Dependent on Tightness of Nut
- The Tapered Split Ring Collet Grips the Tube - The Higher the Pressure the Stronger the Grip
- Seal and Grip are Separate Grips Over a Wide Area, Does Not Bite in Like a Ferrule
- Every Part can be Reused
- No Concentration of Stresses because of Flares or Ferrules
- Unaffected by Vibration

Pressure Ratings of Tube Fittings

The pressure rating for fittings depends upon the size and the safety factor desired. In tube fittings from size 2 thru size 32, it has been generally found that the fitting itself is stronger than the tubing. Listed below are the LENZ pressure ratings for O-Ring Seal Tube Fittings. Thus the safety factor of the tubing governs the limiting factor for the assembly. Typical recommended maximum static working pressure for the tube fittings with SAE J525 (1010) steel tubing with a 4:1 safety factor are:

SVI Dash #	PRESSURE
4	4,500 psi
5	4,000 psi
6	4,000 psi
8	4,000 psi
10	3,000 psi
12	3,000 psi
14	2,500 psi
16	2,500 psi
20	2,000 psi
24	1,500 psi
32	1,125 psi

Ferrule Lock Flareless Bite Fittings

CONSTRUCTION

SVI's Ferrule Lock Flareless Bite Fittings consist of three main components—Bodies, Nuts, and Sleeves.

BODIES: Straight bodies are machined from bar stock. Shape fittings (elbows, tees, & crosses) are machined from forgings. These Ferrule Lock Flareless Bite Fittings are machined with NPTF - Dryseal Pipe Threads and SAE straight threads for easy installation.

TUBE NUTS: Tube Nuts in sizes 1/4", 5/16", 3/8", 1/2", 5/8", 3/4", 1" are cold formed in 1010 Steel. Tube Nuts in sizes 1 1/4", 1 1/2", & 2" are hot forged from 1045.

TUBE SLEEVES: Flareless Tube Sleeves are machined from cold drawn 12L14 bar stock and are available in both SAE "A" and "B" styles (see tube sleeve drawings to view the "A" and "B" style sleeves). After machining and inspection the tube sleeves are heat treated to provide them with the necessary hardness.

CAUTION: Stainless steel sleeves must be preset into tubing during installation.

APPLICATIONS

For use with applications such as: Construction Machinery, Textile Machinery, Machine Tools, Chemical, Marine, Military, and most other high pressure hydraulic applications. Applications using thick wall tubing where flaring is not practical.

CAUTION: SVI's Ferrule Lock Flareless Bite Fittings are NOT RECOMMENDED for use in instrumentation applications where toxic and noxious gases are present.

PRESSURE RATINGS

Working Pressure up to 8000 PSI.

CAUTION: Working pressures will vary depending on tube and fitting size. (For applications using extreme pressures at 5000 PSI or above (or) for application with extreme pressure fluctuations, contact SVI.)

MATERIAL

Steel – Forged Bodies 1045

Straight Bodies 12L14, 1045

Cold Formed Nuts 1010

Bar Stock Nut 12L14

Flareless Sleeves 12L14

Stainless Steel – Forged Bodies 316

Stainless Steel – Straight Bodies 316

Stainless Steel – Bar Stock Nuts 316

Stainless Steel – Flareless Sleeves 17-4PH

PLATING

Clear Zinc Trivalent. Alternate plating finishes are available upon request. Contact SVI for details.

TEMPERATURE RANGE

-30 Degrees Fahrenheit to +450 Degrees Fahrenheit Straight thread fittings which use "O" Rings to seal are restricted to the temperature range of the material used to construct the "O" Ring.

HOW TO ORDER

Tubing sizes are measured in sixteenths of an inch. Available sizes are 1/8" through 2". When ordering, the tube end of the fitting must be specified first followed by the pipe thread or straight thread end. All fittings in this section are ordered as assemblies only unless otherwise specified by customers when ordering. (Contact SVI when ordering fittings as bodies only or configurations which are non-standard.)

CONFORMANCE

SVI's Ferrule Lock Flareless Bite Fittings meet SAE J514 and MS (Military Specifications).

ASSEMBLY INSTRUCTIONS

Using a presetting tool, the flareless sleeve should be preset and inspected before final assembly of the fittings is made. All Stainless Sleeves must be preset before final installation.

1. Cut the tubing to the desired length making sure the ends are square. (Refer to the tube penetration chart when measuring tube length.) Remove all burrs and foreign matter from the end of the tubing and clean thoroughly.
2. Lubricate the threads of the preset body, tube nut, and outer edge of both ends of the flareless sleeve.
3. Slide the tube nut and the flareless sleeve onto the tubing making sure the open end of the nut and the leading "bite" edge of the sleeve are facing the end of the tubing.
4. Insert the tubing into the preset body until it hits the bottom or shoulder of the tool. Bring the flareless sleeve and tube nut down to the preset tool and tighten the nut to the finger-tight position.
5. Using a marker make a reference line on the tubing and tube nut. Holding the tubing firmly in the preset tool and using a wrench, tighten the tube nut an additional 1-3/4 turns past the finger-tight position. Disassemble the nut from the preset tool and inspect the flareless sleeve for the proper bite into the tube. (Refer to example drawings for correct and incorrect preset sleeves.)
6. Should the preset sleeve look acceptable, insert the tube with the preset sleeve into the fitting body to be assembled. Tighten the tube nut to the finger-tight position. Then using a wrench tighten the nut until a sudden rise in torque is felt. From the point where the sudden rise in torque started turn the nut an additional 1/3 to 1/4 turn. Your assembly is now ready for use. (Refer to the assembly torque charts during installation of these ferrule lock flareless bite fittings from the port and thread assemblies section.)

CORRECT ASSEMBLY SAE "B" STYLE

SAE "B" Style

Tube Length Allowance

The above example shows an assembly using the SAE "A" Style flareless sleeve. When assembled properly, the SAE "A" style flareless sleeve assembly will exhibit the following characteristics.

1. A slight indentation around the end of the tube which indicates that the tube was fully inserted during installation.
2. A visible metal lip will have been raised 75% to 100% of the thickness of the sleeves lead biting edge all the way around the tube. (See illustration above.)
3. The midsection of the sleeve behind the leading edge has a slight bow to provide contact with the internal taper of the fitting body and form a sealing point.
4. The back (tail) end of the sleeve will be in firm contact with the O.D. of the tube.

The above example shows an assembly using the SAE "B" Style flareless sleeve. When assembled properly, the SAE "B" style flareless sleeve assembly will exhibit the following characteristics.

1. A slight indentation around the end of the tube which indicates that the tube was fully inserted during installation.
2. A metal lip will have been raised 75% to 100% of the thickness of the sleeves biting edge which is hidden under the leading end of the sleeve. (See illustration above.)
3. The midsection of the sleeve behind the leading edge has a slight bow to provide contact with the internal taper of the fitting body and form a sealing point.
4. The back (tail) end of the sleeve will be in firm contact with the O.D. of the tube.

This catalog is a sampling of sizes and fittings. Many others available—just ask!

Strut Support System Supplies

METAL FRAMING CHANNEL - Cold formed in modern rolling mills from 14 gauge low carbon steel strips. A continuous channel with inturned lips provides the ability to make attachments at any point.

LENGTHS - Metal Framing Channel is available in 10 and 20 foot standard lengths.

FINISH - Channel is supplied with a special green epoxy finish.

CHANNEL HOLE PATTERN - Both BH-5400-04 and BH-5400-09 series come with slotted holes. Holes are located every 2" on center and are 9/16" wide by 7/8" long making installation location easy.

5400 METAL FRAMING CHANNEL

- Versatile
- Economical
- Easy to Install

Part #	Height	Width	Steel	Length	Weight per foot
BL-5400-04	1-5/8"	1-5/8"	14 Ga.	20 feet	1.4 lbs.
BL-5400-04A	1-5/8"	1-5/8"	14 Ga.	10 feet	1.4 lbs.
BL-5400-09	13/16"	1-5/8"	14 Ga.	20 feet	.97 lbs.
BL-5400-09A	13/16"	1-5/8"	14 Ga.	10 feet	.97 lbs.

Note: Other styles and sizes of channel are available!
Call for details and minimums.

CHANNEL NUTS (use with BL-5400-04 series channel)

Channel Nuts are one of the main components of the metal framing system. Each is designed to provide essential gripping power and ease during installation. Channel Nuts are press formed, machined and hardened from steel which meets the requirements of ASTM A576, ASTM A675 and ASTM A108.

Recommended Torque

3/8"-16 19 foot/lbs.

1/2"-13 50 foot/lbs.

Note: Other thread size channel nuts are available call for details and minimums.

BL-5420-54E	1"	.065	1"	9/32"
BL-5420-54F	1-1/4"	.065	1-1/4"	21/64"
BL-5420-54G	1-1/2"	11 ga.	1"	.380

Standard Pipe Strap

Part #	Size	"A"	"B"	"C"	"T"
BL-5420-56A	1/2"	5/16"	7/16"	2-13/16"	10 ga.
BL-5420-56B	3/4"	5/16"	7/16"	3"	10 ga.
BL-5420-56C	1"	5/16"	7/16"	3-17/32"	10 ga.
BL-5420-56D	1-1/4"	5/16"	7/16"	3-3/4"	10 ga.
BL-5420-56E	1-1/2"	5/16"	7/16"	3-25/32"	10 ga.

Edge Pipe Clamp

Part #	Size
BL-5420-59A	1/2"
BL-5420-59B	3/4"
BL-5420-59C	1"
BL-5420-59D	1-1/4"
BL-5420-59E	1-1/2"

Use to support pipe or rigid conduit perpendicular to the edge of a beam or angle iron.

1 Hole O.D. Tubing Clamp

Part #	Size	"A"
BL-5420-55D	1/2"	1-1/32"
BL-5420-55E	5/8"	1-3/32"
BL-5420-55F	3/4"	1-5/32"
BL-5420-55G	7/8"	1-7/32"
BL-5420-55H	1"	1-9/32"

Parallel Pipe Clamp

Part #	Size
BL-5420-58B	1/2"
BL-5420-58C	3/4"
BL-5420-58D	1"
BL-5420-58E	1-1/4"
BL-5420-58F	1-1/2"

Use to support pipe or rigid conduit parallel to the edge of a beam or angle iron.

Standard Clevis Hanger

Part #	Size	"A"	"B"
BL-5420-67A	1/2"	3/8-16	2-1/8"
BL-5420-67B	3/4"	3/8-16	7/16"
BL-5420-67C	1"	3/8-16	7/16"
BL-5420-67D	1-1/4"	3/8-16	7/16"
BL-5420-67E	1-1/2"	3/8-16	7/16"

Use to suspend non-insulated stationary pipe allowing for vertical adjustment.

REPAIR PARTS FOR

LUBRICATION & SPRAY EQUIPMENT

INCLUDING REPAIR PARTS FOR:

**TERMS AND CONDITIONS OF THE
SALES ORDER
FOR SVI INTERNATIONAL, INC.**

1. **GENERAL.** The terms and conditions of sales order outlined herein shall apply to the sale by SVI INTERNATIONAL, INC. (hereinafter referred to as "Company") of the items described on the facing page (hereinafter referred to as "Merchandise") to Purchaser.
2. **DELIVERY.** Delivery shall be deemed to be complete when the Merchandise has been shipped F.O.B. Company's plants in DeKalb, Illinois, Montclair, California; and Hanover, Maryland ("Company's plants"). Shipments are subject to delays from causes or contingencies beyond the reasonable control of the Company. When otherwise not specified, shipments will be made in standard containers via carrier which, in the judgment of the Company, will result in the most practical method. Title and right of possession will pass to the Purchaser upon receipt by the carrier at the shipping point. If a customer of the Company should specify a specific carrier's method of shipment (i.e. UPS Next Day Air) and that carrier does not perform to the customer's expectations, freight credit to a customer's account will not be issued unless the Company can first obtain a credit.
3. **RISK OF LOSS.** Identification of the Merchandise under Uniform Commercial Code (hereinafter referred to as "UCC") Section 2-501 shall take place at the moment of shipment F.O.B. Company's plants. Risk of loss shall pass to the Purchaser when the Merchandise is shipped from the Company's plants.
4. **TITLE.** Title to the merchandise shall transfer to the Purchaser when the Merchandise is shipped from the Company's plants.
5. **WARRANTIES.** The Company guarantees its products to be free from defects in workmanship and raw materials for a period of one year from date of purchase. THIS WARRANTY IS EXPRESSLY IN LIEU OF ANY AND ALL WARRANTIES EXPRESS OR IMPLIED. COMPANY DOES NOT WARRANT THE MERCHANDISE IS MERCHANTABLE OR FIT FOR ANY PARTICULAR PURPOSE. Company's liability for breach of the terms of this Agreement, including any warranty, is limited to either refund of the invoice price of the Merchandise or at Company's option, replacement of the Merchandise free of charge, including transportation charges but not including the cost of labor. Purchaser has not relied on any statement or upon the conduct of Company with respect to the prospective use of the merchandise. Company shall not be liable for and Purchaser waives any and all claims for any loss or damage, directly or indirectly, arising from the use of the Merchandise and for punitive, incidental or consequential damages, including, but not limited to, damages to property, for loss of use, loss of time, loss of profit or loss of income. The Company does not authorize the sale of our products under any other warranty, expressed or implied. **Please note:** Electrical components and cylinder or shaft seals are not covered under warranty.
6. **SETOFF.** All claims for money due or to become due from the Company shall be subject to deduction by the Company for any setoff or counterclaim arising out of this or any other claims of the Company or its affiliated companies, whether such setoff or counterclaim arose before or after any assignment by Purchaser.
7. **INDEMNIFICATION.** Purchaser agrees to indemnify the Company and hold it harmless from and against all claims, liability, loss, damage or expense, including reasonable counsel fees, arising from or by reason of any modifications or alterations made by Purchaser. If a customer of the Company modifies or alters any part, in any manner whatsoever, or uses any part in departure from recommended performance specifications, said customer agrees to indemnify and hold the Company harmless from and against all liability and expenses based on damage to property or injury to or death of any person arising out of or attributable to such modified or altered part. Further, the Company will not accept any such modified or altered part for credit to a customer's account.
8. **FREIGHT POLICY.** Freight charges are prepaid and added to invoice or collect FOB shipping point. Note: All customers are responsible for all carrier shipping costs, fees, surcharges, etc. including order refusal and return fees.
9. **RETURN POLICY.** To return a part for credit or inspection, Purchaser must first contact our Main Office in Illinois, to obtain a Return Merchandise Form. Once Purchaser has obtained this form, the parts can be returned freight prepaid only. The Return form must be included with the shipment. Parts returned to the Company without the approved form will be returned freight collect to the shipper or refused. Returns must be initiated within 30 days of the invoice date. The Return Forms are valid for 30 days, from the date of issue. All Returns are subject to restocking charges. Return parts brought into our remote warehouses, will not be accepted by our personnel, without a Return Merchandise Form from the Main Office. Parts which have been used in any way or manner, including any installation or incorporation into a lift, hoist, or other equipment, shall NOT be eligible for return whether or not a Return form has been assigned. **Please note:** Electrical parts or components are not returnable for credit. This includes all switches, pushbuttons, relays, electric motors, capacitors, fuses, solenoids, power units with wiring issues or any other electrical items. Custom, built to order, special order, and non-stocked genuine parts are non-returnable.
10. **RESTOCK CHARGE.** Returns are subject to a restocking charge. Refusals are subject to the same restocking charge plus the cost of outbound and return freight charges and/or fees incurred by the Company due to shipment refusal.
11. **PRICES AND PAYMENTS.** All prices are subject to change without notice. All prices are F.O.B. shipping point. The Company standard terms are net 30 days, C.O.D. company check, C.O.D. cash, VISA, MasterCard, Discover or American Express. However, if in the judgment of the Company, the financial condition of the Purchaser at any time does not justify shipment according to standard terms of payment, the Company may require full or partial payment in advance.
12. **INTERPRETATION.** This sales order is intended by the parties as a complete and exclusive statement of the terms of their agreement. It supersedes all prior agreements, written or oral. No course of prior dealings between the parties and no usage of the trade shall be relevant to supplement or explain any terms used in this sales order. Acceptance or acquiescence in a course of performance rendered under this purchase order shall not be relevant to determine the meaning of this sales order even though the accepting or acquiescing party has knowledge of the nature of the performance and opportunity for objection. Whenever a term defined by the UCC is used in this sales order the definition contained in the UCC shall control.
13. **MODIFICATION.** This sales order can be modified or rescinded only by a writing signed by both parties.
14. **WAIVER.** No claim or right arising out of a breach of this sales order can be discharged in whole or in part by a waiver or renunciation of the claim or right unless such waiver or renunciation is supported by consideration and is in writing signed by the aggrieved party.
15. **ASSIGNMENT.** No right or interest in this sales order shall be assigned by either party without the written consent of the other and no delegation of any obligation owed, or of the performance of any obligation by either the Company or Purchaser shall be made without the written consent of the other party. Any attempted assignment or delegation not made in conformity with this paragraph shall be wholly void and totally ineffective for all purposes.
16. **TIME TO PERFORM AND BRING ACTION.** Time is of the essence of this sales order. Any action for breach of this sales order shall be commenced within two (2) years after the cause of action has accrued. Any party who loses any litigation shall reimburse the other party for costs including reasonable attorney's fees. The exclusive jurisdiction for any legal action shall be the Circuit Court of DeKalb County, Illinois.
17. **APPLICABLE LAW.** This sales order shall be governed by the UCC of Illinois as effective and in force on the date of this sales order.
