Turf Equipment / Utility Vehicle Attachments for Automotive Lifts

- Golf Courses
- Park Districts
- Municipalities
- ATV Dealers
- Public Works
- Amusement Parks
- Vacation Resorts
- Agricultural Shops
- and so many more...

No. 1—The First: An SVI wholly-owned subsidiary was the very first ever to invent Turf Attachments for use on automotive lifts. On September 9, 1997 SVI's very own MLM Lifts and Manufacturing (formerly known as Manitowoc Lift) developed the very first production drawings for a Turf Equipment Lifting Accessory. This innovative product line has allowed thousands of lift owners to convert their automotive lifts into a multi-functional tool. This allows for both service of their cars and pickup trucks but also ease of repair access to all the turf and small maintenance equipment also found in and around their shop.

Turf Attachments are an ideal tool to incorporate into any shop that has a two-post automotive lift or in-ground side-by-side that also has the need for servicing all types of other equipment. Turf Attachments are ideal for park districts, golf courses, outdoor power equipment dealers, municipalities, ATV dealers and just about anywhere else that requires more versatility from their lifts.

SVI has emerged and remains the leading supplier in its field for turf / utility attachments. The nimble nature of SVI engineering and strong focus on customer service allows for a wide range of flexibility in producing attachments to fit virtually all makes and models of two post surface mount lifts encountered in the field. Put the SVI team to work for you today, attachments can be made for any two post lift including those with true asymmetric or triple stage swing arms. For a whole variety of turf / utility attachment solutions—SVI is your Answer!

SYMMETRIC / ASYMMETRIC

| **LOW PROFILE OVER ARM STYLE**

The **Industry's #1 Choice** for
Symmetric or Asymmetric
2-Post Surface Mount Lifts
and In-Ground Side-By-Side

HOW IT WORKS

- Transition weldments provide an even surface on swing arms to allow plenty of wheelbase adjustment for trays and/or turf forks.
- No need to remove lift pad adapters during installation, transition weldments and trays simply fit directly over arms for super fast and easy installation.
- T Handle crank weldment clamps tray onto arm for secure stay put connection.
- Trays placed on arms allow for more drive through clearance and gives you the full width of your lift to work. No reduction in work area like that of turf rail / HSR styles.
- 4,000 pound capacity per tray for the standard LPO trays, higher capacity heavier duty trays available upon request.
- LPO Attachments have been proven for over 20 years, originally invented in 1997.
- Customizable to fit any symmetrical or asymmetrical style lift.
- Adjustable turf forks fit directly over and clamp onto arms or transition weldments. Turf Forks lift by the wheels to allow greater clearance and access underneath vehicle. 900 pound capacity (per fork), and forks can be adjusted for different wheel bases and track widths.

TURF TRAY CAPACITY

LPO style turf and utility vehicle attachments are easily customizable to fit the widest range of two post lift equipment found in any shop. Pictured above is an SVI custom made tray for an asymmetric lift.

LPO trays are available in standard duty capacities as well as heavy duty capacities for use on the larger capacity two post surface mount lifts.

Being the first, SVI is also the largest and most versatile supplier of Turf and Utility vehicle attachments for two post surface mount lifts in North America. With more styles to choose from and unmatched engineering expertise, professionally run shops always choose SVI.

Call today with your needs and outer arm tube dimensions to get the price and delivery date. SVI is equipped to get you custom products for these turf lift accessories, among many other products.

HSR ADAPTER HOLE MOUNT STYLE | HIGH SIDE RAIL

TURF AND UTILITY TRAYS

FOR 2-POST LIFTS
SYMMETRIC ONLY

2-Post Surface Mount Lift Turf and Utility Vehicle Attachment Kit for select makes and models.

EASY, QUICK INSTALLATION
Turns an Auto Lift into an Everything Lift.

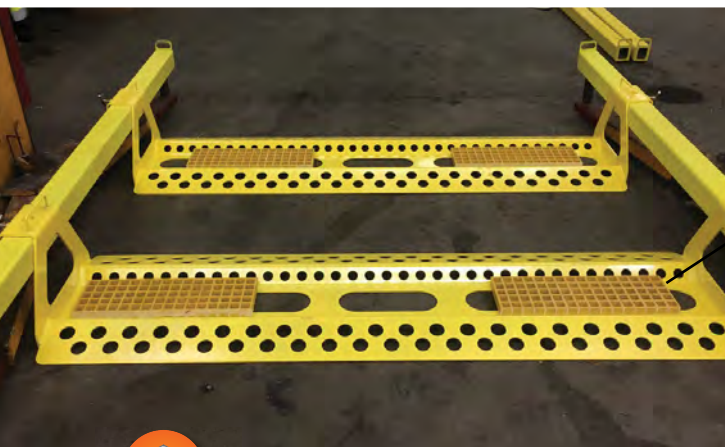

The **HSR or High Side Rail** adapter hole-mount style is ideal for use on lifts where the adapters are the drop-in kind that can easily be lifted out.

Once the standard lift adapter bases are removed and replaced with the optional height extensions, the side rail supports can be easily put in their place for full arm support. After installing the side rails simply set each lifting tray over the rails in the desired position and go.

HSR style turf and utility vehicle tray attachments for two-post surface mount lifts are perfect for just about any suitable application found at golf courses, airports, ATV dealers, city, state and municipal parks, college campuses and so many other locations that have two-post surface-mount lifts and need a broader range of lifting capabilities.

- Go from Car Lift to “Anything Lift” in minutes
- More versatile and takes up less shop space than any 4-post lift
- 7,000 lb. lifting capacity / 3,500 lbs. per tray
- 3,175 kg. lifting capacity / 1587 kg. per tray
- Fits Common Two Post Surface Mount Symmetric Lifts
- Side Rails use existing lift height extensions for installation

Pictured
with optional
composite
grating

When the HSR system is not in use, it takes only a minimal amount of floor space for storage.

TURF AND UTILITY TRAY JACKS

*For use on SVI turf and utility tray
attachments for automotive lifts.*

*Offers more
versatility
to your lift!*

*Use individually
or in pairs.*

Turf and utility vehicle lifting trays are an ideal solution for any shop with an automotive lift that also services lawnmowers, ATVs, UTVs, or just about any other motorized vehicle that isn't a car or a truck. SVI is the leader in standard and custom-made turf and utility vehicle attachments for lifts.

Optional lifting tray jack assemblies provide users with an even greater level of flexibility. These jack assemblies are ideal when a technician needs to remove wheels, service drive components, or gain better access for any reason. The jacks are easy to position on the tray rails and available in 500 or 1000 pound capacity models. Operation is easy, all you need is a socket and a ratchet and up or down it goes. Jacks can also be used in pairs for higher capacity lifting requirements or additional stability.

SVI produces jack versions to fit either the "LPO" or "HSR" styles of turf and utility vehicle lift attachments for automotive lifts. All final jack assembly is done in the SVI manufacturing facility located in DeKalb, Illinois.

To add more versatility to any lift, as always—SVI is your Answer!
