~ DOES NOT REQUIRE ELECTRICITY OR HYDRAULIC PUMP ~

HOW THE LIFT WORKS

This semi-hydraulic air/oil lift may be the easiest lift to operate in the world. Simply connect a flexible shop air line to the supplied valve control line and depress the valve introducing air to raise the lift. Once raised to the desired height, release the valve, disconnect your air line and the valve control line if you wish. The lift will stay up in place. When it is time to lower the lift, reconnect the valve control line (if you removed it), and depress the valve. The air will slowly discharge through the valve and the lift will return back to the floor. Or, release the valve at any point during descent and the lift will promptly stop going down for your next work level. ***It's that easy!***

ABOUT SESM LIFTS BY SVI INTERNATIONAL, INC.

In America's heartland, DeKalb, IL - SVI is the leading supplier of high capacity, low pressure single-acting lifting systems for the small equipment lift industry. Through acquisitions of Globe Lift and the former Gilbarco lift division, SVI has an extensive engineering data bank that extends back to 1920s. This broad knowledge base and an ever present can-do attitude has driven SVI into many markets as a mainstay supplier of products to increase shop productivity.

The H-Frame SESM lift from SVI is a perfect solution for those engaged in the sale, service and use of smaller equipment associated with the golf cart and outdoor power equipment industries. This style of lift can be found in golf cart service departments, landscape equipment maintenance shops, ATV dealers, and just about anywhere else someone wants to make their job more productive and easier to accomplish. Best of all, no piping is required and installation and operation is a breeze.

The H-Frame Superstructure long arms move in and out for width positioning. The swivel arm lift adapters slide back and forth for length adjustment and additionally 360° in full swivel for ultimate versatility. Optional rubber lifting height extensions are also available to aid with uneven lifting points or more in desired working height. These lifts can also be produced with varying stroke lengths per request. Like it was said, coolest little lift on the market! SVI is your answer.

Great pride is taken as SVI supports American jobs, American craftsmanship, American engineering and all the American companies we can proudly call our customers. Please put an H-Frame SESM lift to work in truly awesome shops today.

Install Anywhere benefits

- Work at your height, not the floor height
- Helps recruit and retain the best shop technicians
- Operates off shop-air compressor / Self-contained unit, no under floor piping, no external air/oil tank
- Various Stroke Lengths and Cylinder Sizes
- Compatible with all Hydraulic Fluids including Coast Guard and US Forestry Service Approved Environmentally Safe Fluids
- Design that lasts more than a lifetime
- Easy-to-service cylinder, only 1 moving part!
- Greatly improves shop productivity
- Ideal for rental properties—this lift is easily removed for relocation. Simply unbolt from the floor and remove. Add some backfill to existing hole and patch the concrete like it was never there. Reinstall lift in your new location.
- Must-have for busy shops
- Optional 360° Rotation (for some models) keeps you between the work and the workbench
- No obstruction when lowered—park right over it.
- Safer than a scissor lift—SESM lifts have fewer pinch points and is less of a trip hazard with the lowered height far less than a collapsed scissor lift or a lowered 2-post lift. Fewer moving parts on the SESM lifts also results in less maintenance than a scissor lift or a 2-post lift.
- Superior operation and safety compared to imported above-ground lifts
- Get the real deal for All-American shops — Welded together by Americans for Americans!
- The best purchase a shop owner/operator can make!
