

# Economical Options for lifting the 2020 Toyota GR Supra!

**Toyota dealers already know**, but does everyone else who services vehicles understand the nuances of lifting a new GR Supra? The GR Supra is a wide body car with a short wheelbase, like a Porsche for optimum handling.

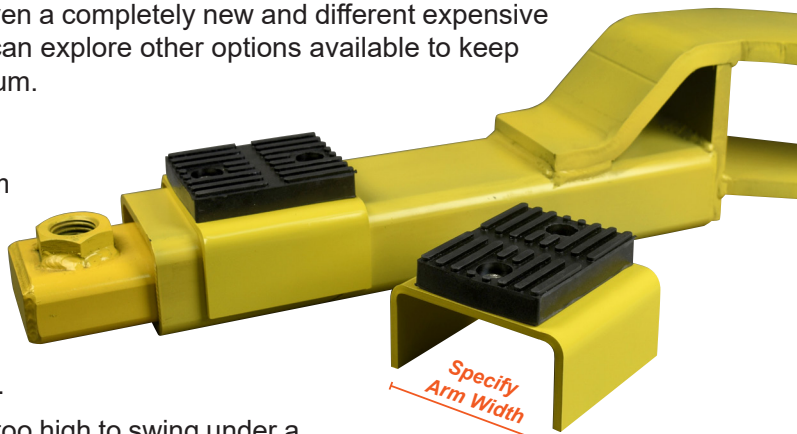

While the lifting points are dropped down lower than the floor pan, they are only 50-3/4" apart front to rear, center to center. Side to side, the lifting points are 60-3/4" apart center to center. The front lifting point floor clearance is 5-1/2", while the rear is only 5".

This all means **it can be difficult to lift a GR Supra** on some lifts without using some creativity and employing some alternative methods to safely, properly and without damage lift a GR Supra. Lifting a GR Supra does not necessarily mean a bunch of costly new components or even a completely new and different expensive lifting superstructure. It does mean you may need to and can explore other options available to keep service department costs and lift modifications to a minimum.

## SUGGESTION:

Using existing lifts and the help of outer swing arm lifting arm pad adapters, many lifts can easily accommodate the GR Supra. Slide the inner lift arms on an existing lift all the way in. If needed for clearance, remove the existing adapters and position lift arm pad adapters in place on the outer arm. Place the arms and pad adapters in position under the dropped-down lifting points and lift the GR Supra.

If the combination of the outer arm and the arm lift pad are too high to swing under a GR Supra, use an SVI's 2-1/2" Rubber Riser Pads to raise the vehicle's height so the arm will freely swing underneath and to the lifting points. You may find on some lift models that arm pad adapters are only needed for either the front or rear lifting arms.

**Arm Adapter  
with Rubber Pad**

## 2-1/2" Rubber Riser Pads

With SVI's Rubber Riser Pads, raise low-profile cars up higher from the floor for easier placement of 2-post swing arms

- SC-8150-25** Rubber Riser Pad Individual (1)
- SC-8150-25-4** Rubber Riser Pads Set of 4
