

*Products for the equipment you use everyday.*

**DIRECT FIT™** BRAND REPAIR PARTS AND SOLUTIONS

**Auto lift repair parts—they are available!**

One of the SVI specialties is the non-stop supply of repair parts for most makes and models of automotive lifts, regardless of age or style. Many lift manufacturers have come and gone, but not the parts to keep the lifts going. SVI ensures that all lift owners have a viable source to keep their lifts operating properly. Whether it is ever-crucial safety components or the most basic common wear items, SVI is your Answer.

# Keep your lift running right!!

## What makes SVI different?

### SVI has a huge in-stock inventory!

SVI supplies over 30,000 garage equipment spare and repair parts for the automotive service industry, and the majority of those are in stock! We provide same-day shipping for in-stock parts to keep the equipment in shops up and running safely, minimizing any downtime. With two "Ready-Ship" warehouses across the USA, shipping time is fast and freight costs are minimized.

### SVI Listens. SVI Reacts. *(Even when others won't).*

The word "obsolete" is hardly a word that fits into our vocabulary. Having trouble getting that hard-to-find or so-called obsolete part? SVI is here to help. When we make a part available for any lift or equipment whose manufacturer is no longer in business, that part is **available again forever**. If, for any reason, someone ever tells you parts are no longer available for an automotive lift, tell them to think again and ask them if they called SVI.

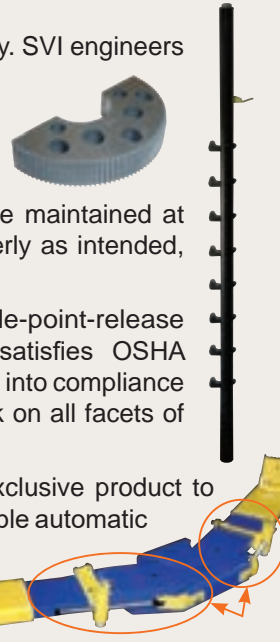

### SVI is Innovative.

Product innovation is a very important part of SVI's role in the lift industry. SVI engineers and management team are always working on safer solutions for both older and newer lifts existing in the field.

One example is SVI's exclusive adjustable main arm restraint gears for use on Rotary and other two-post surface lifts. This product allows full adjustability so proper mating between arm restraint gears can be maintained at all times. This means the arm restraint is functioning safely and properly as intended, keeping your lift compliant; no one else does this.

MPTRs are just another example. This bolt-on compliance single-point-release multiple-position safety leg for single-post and fore-and-aft lifts satisfies OSHA requirements. This patented product allows lift owners to bring lifts easily into compliance with the ANSI standard in just a few minutes time. SVI engineers work on all facets of the auto lift industry's needs.

In 2015, SVI engineering led the way with another innovative and exclusive product to bring wide drive-through lifts into conformance by developing a field-fittable automatic arm restraint kit for these models. This is an industry first and allows owners of lift models such as the Globe FS-28 to become immediately compliant, saving the lift and the huge cost associated with complete replacement.

#### REPAIR PARTS FOR:

- Automotive Lifts
  - Surface Mount
  - In-Ground
  - Low-Rise Lifts
  - Mid-Rise Lifts
  - Rolling Air Jacks
- Brake Lathes
- Compressors
- Exhaust Removal Systems
- Lubrication and Paint / Foam Spray Systems
- Petroleum and Service Station Parts
  - Repair Parts for Gasboy Consumer Series
- Tire Changers
- Wheel Balancers
- ...and much more!

If you ever have any suggestions please let us know—SVI listens • SVI reacts • SVI is your answer. In fact, SVI was the first, the only, to develop the patented "Aqua-Out" system for use on new cassette style in-ground lifts. The "Aqua-out" system addresses the accumulating moisture condition that can lead to dangerous corrosion problems associated with these lifts by automatically removing excess water each time the lift is lowered. This is another SVI-first example for the automotive lift industry.

When it comes to real solutions, safety or otherwise for the lift industry, SVI is your answer. SVI staff is not just knowledgeable on one make of lift. SVI support representatives are the most knowledgeable group of people in the lift industry. No matter what makes or models of lifts used in your shop, an SVI representative can help.

### SVI is an America-First Company.

We work hard to keep many of our products American made.

Fact: Many SVI spare or repair parts for use on Chinese-made lifts are made in the United States.

### commonality

Providing these pictured chain rollers for years, many don't realize just how many lift makes use these. It makes perfect sense because they are the rollers found originally on Grand 12,000 lb. 4-post lifts, which were also private labeled to Weaver and others back in the day. The simple design of the Grand model was subsequently cloned by many other companies and sold as their own, or private labeled to others, such as Challenger. If you are working on a 12,000 lb. lift that had its origin in Texas, Arkansas or perhaps Oklahoma, chances are very strong these are the chain rollers you will need. SVI stocks these rollers and the chain for these lifts. We custom cut the chain to your length from bulk rolls for same-day shipping at industry-best pricing. For chain rollers and chain, call us today.

### SOME OF THE MANY ACCESSORIES

- Alignment Turnplates
- Pumps for Rolling Jacks
- Power Station™ Air / Electric Convenience System

## everything to keep lifts operating safe and secure

SVI enjoys an excellent reputation and is known as the “can do” company. We strive to make the best possible products available using best pricing practices. When an SVI customer needs a solution to a problem, or a better-priced alternative for something where others are charging prices that don’t match the feel of the product in your hand, the SVI phone is the first to ring. Engineering is always ready to take on a new challenge to support the demands and needs of our customers. If you are not currently an SVI valued customer, the door is always open when you are ready to experience true customer service and attention to your needs. Plus, SVI customers enjoy lower transit times, more on-time deliveries, lower freight costs and same-day shipments from either of our two “Ready Ship” warehouses.

Casings, Plungers and Complete Cylinder Assemblies

## Are you the Luckiest Technician in the World?

You are if your lift is an in-ground lift. You get to use the safest piece of equipment in the shop and enjoy the most use flexibility over all other lifts. SVI still builds these; the safest lifts ever! Upgrade your shop today, get in, get an in-ground lift.

SVI has more safety related products available for more lifts to satisfy OSHA inspectors than anyone else in the automotive lift industry. Each SVI product innovation is designed by degreed mechanical engineers to meet or exceed applicable standards and safety factors.

**Safety Re-Invented / Safely Re-Invented—SVI is your answer!**

**safe, safer, the safest lift!**

## In-Ground Side-by-Side Twin Post Lifts

**Auxiliary  
Lift Adapter  
Height Extensions**

**Lifting Arm Sleeve  
and Adapters  
Assemblies and  
Individual Parts**

**Complete  
Superstructures**

**Spotter  
Dishes**

***Safety Reinvented***

**For Rotary  
DTO28  
Lift Models**

**satisfy OSHA inspectors**

Incorporating SVI's ever-popular, patented MPTR design, every DTO28 lift can be equipped with a locking equalizer system that provides an initial locking position at 24" of stroke that continues every 6" all the way to full stroke. This is a bolt-on upgrade that literally takes minutes to install. This design exceeds the original single-point locking system and provides more positive engagement for a higher level of safety than previously available.

**Equalizer  
Boxes and  
Covers**

**Rack and Pinion  
Equalizer upgrade  
for DTO28 lift  
models**

**Casings, Plungers  
and Complete  
Cylinder Assemblies**

**ANSI  
Standard Exceeded**

Now, every owner/operator of a Globe side-by-side in-ground lift, whether it was made last year or decades ago, can easily upgrade their lift to not only meet, but EXCEED current ANSI/ALI Standards. This new automatic locking equalizer bracket locks in every position throughout the stroke of the lift. The current standard calls for a lock position every six inches and existing Globe Lifts are either manual locking or auto locking with generally only two lock positions. SVI's design team and engineers have come up with an excellent new product solution for SVI distributors and the owners of Globe Lifts. This means every single side-by-side Globe lift can easily conform to OSHA inspector scrutiny with SVI's Exclusive automatic locking system.

**Rack Bars, Pinion  
Gears and Equalizer  
Components and Kits**

**safe, safer, the safest lift!**

# In-Ground Heavy Duty Fore-and-Aft Lifts

**800-321-8173**

## In-Ground Cassette Style 2 Post Lifts

Complete Lifts,  
Cylinder Assemblies  
and Replacement  
Sections and Kits

### The Big Ones

7-1/2"

8-1/2"

10-5/8"

12-5/8"

Complete cylinder  
assemblies, plungers and casings  
for Heavy Duty in-ground lifts—  
Made in SVI's DeKalb, Illinois  
manufacturing plant.

Out of sight, out of mind corrosion  
may be going on right below a shop  
technician's feet, while 4,000 lbs. of a  
4-door sedan are right above his head.

#### Serious Concerns

SVI recommends  
Aqua-Out for All  
Cassette-Style Lifts

### SVI Recommends **Aqua-Out** for ALL Cassette-Style Lifts

Keep elements of your lift from corroding and failing. **All existing lifts without the Aqua-Out should be upgraded to include it immediately.**

First, install an Aqua-Out and then institute a regimented periodic service and maintenance program for each lift. Make sure regular inspection of the crucial components and full coverage lubrication service is performed routinely. No one wants to hear anything but good news.

*Protect yourself and your lift* from costly repairs and possible dangers associated with corrosion from the accumulating moisture in the bottom of cassette/tub in-ground lifts.

### SVI—RECENT MILESTONES

- 2021** SVI completes major transformation and reorganization of the main warehouse. This included using new storage methods and pursuing a changed philosophy. There is more available space than ever before for pursuit of company growth objectives and inventory to meet customer needs. The transformation has also resulted in greatly improved overall warehouse productivity. The benefits are many including easier order picking, inventory management, quality control, and an much improved working environment.
- 2021** SVI develops specially designed retractor clamps for the electric vehicle "EV" charging industry. Various clamps are available for the full size range of cables from level one to level three charging stations. They are RoHS 3 Compliant and available in both ball shaped and clamshell configurations.
- 2018** SVI officially becomes the industry's largest selection provider of specialty lifting adapters for 2019 model year and up GM trucks. Model 1500 Chevrolet Silverado and GMC Sierra use a new frame configuration that is lower and wider toward the front of these trucks. In order to properly and safely lift these vehicles without damage new adapters must be used when lifting on an automotive lift. SVI has the single largest selection of GM Truck adapters for many makes and models of lifts to make properly lifting these vehicles possible.
- 2018** SVI introduces rolling jack or rolling bridge arm extensions. These arm extensions are designed for use on existing rolling jacks in concert with vehicles featuring wide lift points that the standard sliding arms cannot reach. Typical arm extensions are available in 9" and 10" extended lengths.
